Re: Marriage of Smith

Dear Ms. Attorney:
I have evaluated the Public Employees Retirement Association of New Mexico (PERA) pension benefits for Mr. Smith as you requested.

## Valuation of Benefits

In my opinion, the actuarial present value of the benefits accrued as of $6 / 14 / 2021$ (the date of the pension estimate provided), is $\$ 750,000^{1}$. The community share proportion is .6000 , which makes the community share worth $\$ 450,234$ and the former spouse's share worth $\$ 225,117$.

The community share was estimated based on 15.00 years of full-time service credit accrued between the date of marriage and date of divorce, divided by a total of 25.00 years of service credit accrued as of $6 / 14 / 2021$.

## Statistical Information and Valuation Assumptions

For purposes of my report, I assumed no Additional Retirement Service Credit ("air-time"), redeposits for previously withdrawn contributions, military service or service prior to membership occurred within the account. If this is incorrect, please let me know immediately so that I may update my report as necessary.

The amount of the pension benefit accrued as of $6 / 14 / 2021$ was from the State General Plan 3 (Tier 1) formula in the plan booklet, based on salary information you provided. The current average salary is $\$ 3,500$ per month.

[^0]The valuation and community share proportion therein were based on the following:

| Date of Birth: | $06 / 14 / 1966$ |
| :--- | :--- |
| Date of Hire: | $6 / 14 / 1996$ |
| Date of Marriage: | $06 / 14 / 2006$ |
| Date of Divorce: | Pending |
| Date of Accrual: | $06 / 14 / 2021$ |
| Date of Valuation: | $06 / 14 / 2021$ |
| Benefit Payable: | $\$ 2,625$ per month @ 55 |
| Pre-retirement growth: | None |
| Cost-of-Living: | $2.00 \%$ (compounded) |
| Mortality Table: | RP-2014 mortality (male), projected <br> to 2021 using Mortality Improvement |
|  | Scale MP-2020 |

The values stated within this report represent the estimated actuarial present value of the monthly benefit and does not represent an actual lump sum amount payable by the plan.

The values given above are for the defined benefit pension plan only, and do not include the value of benefits expected from participation in any other plan.

Feel free to call me if you have any questions and thank you for the opportunity to be of service.
Sincerely,

## John C. Madden

[^0]:    ${ }^{1}$ All values stated in this report are pre-tax except as noted otherwise.

[^1]:    ${ }^{2}$ Based on 26 CFR 1.430(h)(3)-1 - Mortality tables used to determine present value, and "Actuarial Standard of Practice No. 34 " from the Actuarial Standards Board.
    ${ }^{3}$ Due to the severe drop in interest rates the present value of pension benefits, which has an inverse relationship to interest rates, has increased.
